### **PRESS RELEASE**

**Monday July 23, 2012**

#### **PHD CONTAINERS BEING STUFFED FOR SHIPMENT TO T&T**

**TODAY PINEHILL DAIRY prepared two containers to ship products to Trinidad and Tobago, which recently it was reported were experiencing difficulty entering the twin-island republic.**

Two 40-foot long containers of 2% 1L Ultrapasteurised TGA milk and Whole 1 L Ultrapasteurised milk are being prepared for shipment.

This means that the milk products will be in store shelves in T&T in about one week.

Tomorrow, two more containers will be prepared for shipment to T&T.

On June 21, CEO and Managing Director of Banks Holdings Ltd, Richard Cozier, announced that BHL had run up against a roadblock in accessing the Trinidad market as their Food & Drug Agency indicated that several BHL brands have non-compliant labeling and that Trinidad was the sole regional country to indicate this.

Since then, there have been discussions between representatives of the two countries and this has resulted in progress being made.
